**Co-funded by
the European Union**

* Construction firms, Educational institutions, administrative bodies, architectural firms

Our project „Co4Health“

The construction industry is an important employment sector for all EU countries. The industry's economic efficiency and sustainability depend heavily on its ability to innovate.

Well-qualified construction professionals are in demand.

Future-oriented and attractive vocational training can secure them.

Today, trainers and teachers must be able to impart not only subject-specific skills but also cross-disciplinary skills in order to increase interest in construction professions.

With *Co4Health*, we are systematically introducing the topic of healthy construction as a subject in training and continuing education for construction professions. We show how the results work under different conditions—a significant added value of international cooperation.

Our “Healthy Construction Model” is a joint product that brings together expertise from five EU countries and makes it available throughout the EU.

A few tips in preparation for the event

Directions: The European House is located in the immediate vicinity of the Brandenburg Gate and is easily accessible by public transport: S-Bahn lines S1, S2 and S26, underground line U5 (Brandenburger Tor stop) and bus line 300 (Behrensstr./Wilhelmstr. stop).

Admission and security checks: Please note that admission and security checks will be carried out at the European House. Therefore, please arrive in good time before the start of the event and do not carry any dangerous items with you.

Please register for the symposium before 09.10.2025
